

## Questions and Answers from UK Local Government Webinar 18/9/14

No	Question	Answer
1.	Can AGOL facilitate INSPIRE Metadata data discovery?	At the moment, the ArcGIS Open Data template has not been designed to be INSPIRE compliant. The ArcGIS for Inspire extensions for desktop and server fully support the requirements of INSPIRE up to 2017 and we are more than happy to help you explore this as an option.
2.	How is Maps for Office different from Microsoft Power BI?	Esri Maps for Office is an add-on to Microsoft Office. You can find out more about Maps for Office <a href="#">here</a> . We have not conducted a product comparison with Microsoft Power BI.
3.	How much is QuestionWhere?	The list price for QuestionWhere is £995 per organisation per year. If you currently have the Embeddable Survey template it will be included in your package when you migrate from LocalView Fusion.
4.	Does online support WMS so that it can be opened in other GIS packages than ArcGIS?	ArcGIS Online is a WMS client and can consume WMS and WMTS services. ArcGIS Online is not a WMS server, but you can continue to use ArcGIS Server to provide WMS services that can be consumed by ArcGIS Online.
5.	Could you explain what part of the demo the subscription would be paying for? Is it the ESRI UK "Find My Nearest" template?	The subscription pays for the ArcGIS Online based solution for UK Local Government. It includes an ArcGIS Online subscription plus some applications designed specifically for the UK Local Government market.
6.	Could you explain a little more about using LocatorHub in online?	LocatorHub 5.2 SP2 allows LocatorHub Locators to be configured as ArcGIS Locators. This means that you can use LocatorHub (on premise) to create a locator that can then be consumed directly within ArcGIS Online. See this <a href="#">blog</a> for further information.

7.	Can you confirm that I will be able to serve up multiple internal-only screens to 2000+ staff without having to pay for individual AGOL named-user licences for every member of staff? i.e. LocalView Navigator templates	There are a number of deployment models for the new UK Local Government Solution for ArcGIS. The number of named users required will be determined by how the solution is deployed. We will be working with each customer to ensure that you have sufficient named users to support your community of webmap users.
8.	I lost audio during the period when you were covering costs etc. Can you let me have notes covering that section, please?	The only costs that we provided an estimate for was the Launch Kits. We suggested that customers budget £5K for launch kits to support the migration. The launch kits are pick and mix, so we will be working with you to define the exact services that you need dependent on your level of experience and your requirements. The ArcGIS Online organisational plan is expected to cost a similar amount to your LocalView Fusion Maintenance. Your Customer Success Manager will be in touch to discuss costs with you.
9.	Watermarks - I believe that PSMA members are about to be told that watermarks are no longer required. You should confirm the details with Ordnance Survey.	Thank you – we will follow this up with the Ordnance Survey.
10.	Can we keep our data and ArcGIS server web services still within our internal infrastructure for ArcGIS Online to consume?	Yes. This is the model we expect a lot of our customers to use. Some of the data we were showing in the Sunnyshire demo was hosted in secure ArcGIS Server services.
11.	Can all questions asked and answers supplied please be made available to all participants please	Yes – this is it.
12.	Is there a migration path from our current LocalView templates to the new solution	<p>We are confident that new UK Local Government solution for ArcGIS will provide equivalent and improved capability for our LocalView Fusion users.</p> <p>In some templates there is a like for like replacement of a LocalView template within the new solution e.g. QuestionWhere replaces Embeddable Survey.</p> <p>In other cases templates that are number of alternative templates and apps you could use in the new solution and we will work with you to find the best solution for you.</p> <p>There are also many templates and applications within the new solution that augment the capability of the current LocalView solution.</p>
