

Welcome to ArcGIS How to install the ArcGIS 10.1 Licence Manager

If you are using Concurrent Use licences for your Desktop products you will need to install the Licence Manager, or have access to a Licence Manager which is up and running. This document walks through the process of installing the 10.1 Licence Manager on Windows.

A note on 10.0 and 10.1 concurrent licencing

The 10.1 Licence Manager will support hosting 9.0 up to and including 10.1 licences. This means that if you are working in a hybrid environment with older versions and 10.1 desktop machines, you do not need to install both Licence Managers and have the running together. Please uninstall the 10.0 Licence Manager and install the 10.1 Licence Manager. To avoid disrupting your concurrent use licence users, you may wish to install the 10.1 Licence Manager on a second machine to allow them to continue working during the upgrade. Once the upgrade is complete, any older versions of the Licence Manager must be uninstalled and users directed to the new 10.1. Licence Manager.

Installing the ArcGIS 10.1 Licence Manager on Windows

1. Navigate to the Desktop install media folder and run Esri.exe.
