

NX License Borrowing

March 2020

IDEAL GRP

NX License Borrowing

- Floating NX Licenses have borrowing option by default
 - Licenses can be borrowed for 4 months
 - Reserves license from License pool
 - User must be connected to License service while accessing License Borrowing dialog
- License Borrowing is done from NX Client machine by using Licensing Tool
 - Licensing Tool is located to Windows start menu under NX products
- Select Borrowing Setup → Borrow → Product(s) to be borrowed and return date, then select Ok
- Select products again and Apply. Licensing Tool can be closed after this.
- Licenses can be returned manually or borrowing renewed from this dialog
